Objective

To secure a challenging and rewarding Software Engineering position where I can leverage my academic background, fullstack development expertise (React, Python, Java), and practical apprenticeship experience to build innovative and robust web applications. I am eager to contribute immediately to technical teams and grow within a professional environment.

Experience

Software Engineering Apprentice, *mlab Southern Africa* 07/2025 – 03/2026
Polokwane

- Actively involved in software development projects, applying academic learning to real-world technical challenges.
- Gaining practical experience in professional coding standards and utilizing Git/GitHub for version control.
- Focusing on both frontend and backend development tasks as part of the apprenticeship.

Education

National Diploma in Computer Science, *Tshwane University of Technology* 2022 – 12/2025

- Currently completing a qualification in Computer Science.

Matric Certificate, *Gawula High School* 2021

- Passed grade 12.

Skills & Abilities

Technical Expertise

Specializing in modern fullstack development. Core skills include Frontend technologies (React, Redux, Tailwind CSS, JavaScript ES6+, HTML5, CSS3), Backend Languages (Python, Java, Node.js), and Database management (SQL, MySQL).

Professional Skills

Experienced in Software Testing principles, utilizing Git and GitHub for version control, and proficient in Agile development methodologies.
