Objective

To secure a challenging and rewarding Software Developer position where I can leverage my academic background, full-stack development expertise (React, Python, Java), and practical apprenticeship experience to build innovative and robust web applications. I am eager to contribute immediately to technical teams and grow within a professional environment.

Experience

Fullstack Developer Apprentice | mlab Southern Africa

- Actively involved in software development projects, applying academic learning to real-world technical challenges.
- Gaining practical experience in professional coding standards and utilizing Git/GitHub for version control.
- Focusing on both frontend and backend development tasks as part of the apprenticeship.

07/2025 – 03/2026
Polokwane

Education

National Diploma in Computer Science , Tshwane University Technology

- Currently waiting for Graduation Ceremony

2022 – 12/2025

Matric Certificate, Gawula High School

- Completed grade 12

2021

Skills & Abilities

Technical Expertise

Specializing in modern full-stack development. Core skills include Frontend technologies (React, Redux, Tailwind CSS, JavaScript ES6+, HTML5, CSS3), Backend Languages (Python, Java, Node.js), and Database management (SQL, MySQL).

Professional Skills

Experienced in Software Testing principles, utilizing Git and GitHub for version control, and proficient in Agile development methodologies.

Communication

- Possess clear and concise communication skills developed through collaborative academic projects.
- Experienced in professional reporting during my apprenticeship.

- Adept at articulating technical concepts clearly to both team members and non-technical stakeholders.

Certificates

Database Design

• JavaScriptAlgorithms

• Introduction to SQL
